Forecast for Tuesday 27 Oct 2020

Weather: Any coastal showers fading through the early hours with skies clearing. Then a largely clear and chilly start before sunshine gives way to cloud and rain spreading from the west from late morning. All ranges then set for around 6 hours of rain, on the heavy side at times. Rain turning to sleet and snow above 800m. Skies clearing again through evening.

Chance of cloud free mountain/hill tops above 800m: 80% morning, 20% afternoon as cloud descends to 500-700m quite widely.

Visibility: Very good initially, then often limited to a few kilometres in rain, but much less above the cloud base and in snow.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Be aware of fast deteriorating conditions from late morning. Feeling very cold at height in rain and strong winds.

Forecast for Wednesday 28 Oct 2020

Weather: A dry, cold and locally frosty start then an increasingly windy day of sunshine and showers, these focussed across the west with Easter Ross seeing the best of the shelter. Some showers on the heavy side with hail possible and falling as snow above munro level.

Maximum wind: South or southwest 20-30mph gusting up to 45mph in and around showers.

Chance of cloud free mountain/hill tops above 800m: 40% west, 70% east. Cloud bases generally 600-800m but occasionally lower in showers. Cloud cover much more broken across the more sheltered east.

Visibility: Variable with visibility reduced to a kilometre or less at height in cloud, rain and snow but generally no issues on lower slopes and across more sheltered eastern areas.

Temperature: **Glens:** 0-3C rising 8-10C.
At 800m: Around 1C.
Freezing level: 1200-1400m.
